Ad Text DNA Evidence Proves That The First People In China Were Black: Scientist Li Hui proved 100,000 years ago humans began migrating through South Southeast Asia into China from Africa. Testing showed 65 branches of Chinese all carry similar DNA mutations as the people of Southeast Asia. Scientist Jin Li said, "we did not see even one single individual that could be considered as a descendant of the h?mo erectus in China, rather, everybody was a descendant of our ancestors from Africa."
